

Information system of Republic Administration for the rights of the war veterans and war handicapped people of the R.M

The main purpose of this project is to replace the classical way of working to modern and simple way of computer processing in the Republic Administration for the rights of the war veterans and war handicapped people. Using modular access, this information system enables entering of all departments by regions.

The Republic Administration for the rights of the war veterans and war handicapped people works in the frame of the Ministry of labor and social policy. Their activity is to take care of the rights of the war veterans and war handicapped people and members of their families.

There are about 9000 users of those rights, categorized in two groups:

- War handicapped people
- War veterans (material support)

They are beneficiaries of regular monthly incomes and other periodical payments.

The Republic Administration for the rights of the war veterans and war handicapped people also works on problems connected with graveyards and graves of deceased war veterans.

This project includes following functions:

- REGISTRY
- PAYMENT
- MAKING REPORTS AND SUMMARIES
- EVIDENCE OF GRAVEYARDS AND GRAVES

Developing SW platform

- MS Access
- MS – Windows NT Server / Windows clients.

End users

- Republic Administration for the rights of the war veterans and war handicapped people
