

## **Database for Kosovo Judicial and Prosecutorial Council**

Database for Kosovo judicial system includes all judges and public prosecutors and among other, contains the following data: name, surname, region of working, institution, ethnicity, gender, date of birth, date of graduation, date of swearing-in, date of starting a job etc.

This kind of database is necessary for the functioning of Kosovo Judicial and Prosecutorial Council - the institution responsible for giving opinions for appointing judges, prosecutors and lay-judges and for viewing submitted complaints against the work of some judges, prosecutors or lay-judges and for taking disciplinary procedures.

This system includes the following modules:

- Evidence of personal information for judges, prosecutors and lay-judges.
- Registration of expected systematization for working positions of judges, prosecutors and lay-judges for all courts and prosecutions levels: district, municipal, minor defenses.
- Comparison of planned and active systematization of work position
- Notification for achieved conditions for an anniversary or retirement of some of the judges, prosecutors or lay-judges
- Tracking discipline procedures
- Registration of some of the opinions and advices from separate judges, prosecutors, members of judicial and prosecutorial council, useful for judiciary system
- Report generator
